

LATHS & BATTENS

The standard product range of Kurekss Ltd. includes high-quality roof battens and laths. Sawn timber suitable for manufacturing the product is initially dried to transport moisture, sorted according to general visual criteria or the requirements of the British standard BS 5534, calibrated to the exact size of the final product, and, if necessary, impregnated to ensure a longer service life. Pressure impregnation, as well as double vacuum treatment are possible.

Cross-section (mm)	Grade	Length (m)												
		2,4	2,7	3,0	3,3	3,6	3,9	4,2	4,5	4,8	5,1	5,4	5,7	6,0
